

# Peerapon Chaijittiprasert

## Developer

### PROFILE

As a recent graduate with a strong GPA of 3.72 and programming proficiency, I am currently employed but actively seeking a full-stack developer role. Passionate about learning and growth, I'm drawn to opportunities that offer benefits, continuous development, and a supportive work environment. I prefer roles offering remote or hybrid work options due to my current work commitments.

### EDUCATION

#### ● Naresuan University *Bachelor of Computer Science*

Completed in 2023

##### Courses

- Data Structures and Algorithms
- Object-Oriented Programming
- Internet Programming
- Database Systems

### EXPERTISE

#### Coding Languages

- JavaScript, Java, SQL, PHP, Python, TypeScript, Html, CSS

#### Tools

- Framework - Node.js, Express.js, React, Next.js and Spring Boot
- Database Tools - MS SQL Server, phpMyAdmin, XAMPP and etc.

#### Soft Skills

- Quick Learner, Critical Thinking, Communication and Leadership

### CONTACT

- The Nap @ Nara 22

### WORK EXPERIENCE

#### IBM Thailand Co., Ltd | Intern / Application Developer 06/2022 - 09/2022

- Developed and deployed a Node.js-based web application named "Web Application - Resource Capacity Plan for IBM Manage Service Project" for internal use that imports and filters data from excel files according to specific requirements and allows data to be edited on the website before exporting in the desired format.
- Assisted in developing a jasper report using Jaspersoft Studio to convert the format and appearance of Crystal Reports for ease of use across platforms.
- Designed a flowchart using Figma to support the NSIPS system.
- Proficient with tools essential for program development and communication, including Git, Docker, Postman, Trello, Webex, and Slack.
- Gained experience working with cloud-based technologies such as IBM Db2 on Cloud.

#### D APP MAKER CO., LTD. | Junior / Backend Developer 06/2023 - Present

- Worked on API Development:
  - Developed APIs for PDF Conversion and Customization of Contract Signatures.
  - Ensured Preservation of Original Server Files to maintain data integrity.
  - Conducted thorough testing to guarantee the accuracy and security of documents
- Contributed to the Development of Dynamic Filter Function and Advanced Search Options:
  - Collaborated in designing and implementing a dynamic filtering feature.
  - Enhanced the search functionality with advanced options to optimize data retrieval.
  - Implemented updates to data extraction and display, including default status settings.
- Led the Implementation of Deep Link Navigation:
  - Successfully integrated deep link navigation capabilities for a seamless user experience.
  - Designed and tested the navigation system to ensure smooth functionality.
- Took charge of the Enhancement of the Product Installment Registration Page:
  - Developed and refined the product installment registration page to improve user engagement.
  - Updated relevant modules to enhance overall system performance.
- Developed Robust APIs for Product Recommendations:
  - Engineered APIs that provide reliable and efficient product recommendations.

### PROJECTS

#### Web Application for Exchanging and Trading Knowledge Documents

12/2022 - 03/2023

- Developed a full stack web application, with separate E-commerce and administration websites using Express.js with EJS template for the final project, which served as a webboard for communication and data marketing between users at Naresuan University.

#### Others

06/2019 - Present

- Other projects not yet displayed on my website will be presented in my Google Drive.

### ACHIEVEMENT

May 2023 | Naresuan University (the Science and Technology category)  
**The 3rd prize in the Undergraduate Thesis Innovation Competition.**

NOV 2022 | Naresuan University (the Computer Science program)  
**The 1st prize in the Cooperative Education Competition**
